

P. Sewmuthu Abewickrama Singhe

AI Engineering Intern

apsewmuthu@gmail.com | +94784584589 | Weligama, Sri Lanka | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Computer Science undergraduate (AI/ML specialization). Proven ability to design and deploy AI powered solutions using Python, TensorFlow, and PyTorch. Seeking to contribute expertise in a collaborative environment.

WORK EXPERIENCE

Pre-Intern (Full-Stack Web Developer)

Aug 2023 – Apr 2024

Random Software Pvt. Ltd.

Participated in the Advanced RSLUP 2.0 program, delivering a real-world full-stack project. Gained industry-level training in full-stack development, version control, testing, and professional practices.

Freelancing (Web Scraper)

Feb 2022 – Jan 2025

Freelancer

Worked as a freelance Web Scraper, securing and fulfilling data extraction contracts via platforms like Fiverr. Collaborated with agencies to provide complete technical solutions.

Data Science Intern

May 2026 – Present

Gamage Recruiters (Pvt.) Ltd.

Worked on a variety of individual and team projects focused on AI/ML and data analytics. Spent my time clean engineering data pipelines, building models, and finding key insights to help solve business problems using modern machine learning frameworks.

EDUCATION

Bachelor of Science Honours in Computer Science and Technology

Aug 2022 – Aug 2026

Sabaragamuwa University of Sri Lanka

SKILLS

Python, Machine Learning, Deep Learning, Computer Vision, Natural Language Processing, Data Analysis & Visualization, Version Controlling, Containerization, Java, PHP, Javascript, C#

PROJECTS

Real-Time AI-Powered Sign Language Translator

[View Project](#)

Technologies: FastAPI, React, Python, OpenCV, TensorFlow/PyTorch, NLP, Computer Vision

Engineered a real-time, emotion-aware ASL translation system integrating computer vision and LLMs. Contributed to open research by publishing custom-trained models and datasets on Kaggle and HuggingFace.

AI-Powered Intelligent CCTV Surveillance System (Ongoing)

Technologies: Python, OpenCV, PyTorch, YOLO, FastAPI, Vector Databases

Developing an intelligent surveillance platform for real-time multi-object tracking, re-identification, and trajectory analysis. Integrating deep learning-based detection and spatial analytics to process multiple video streams.

NLP-Based Resume Parser

[View Project](#)

Technologies: Python, Natural Language Processing, Regular Expressions, JSON

Built an intelligent tool that automatically reads resumes in PDF or Word formats. It uses text processing to find and extract contact details, work history, and skills, turning messy files into clean, organized data.

Market Demand Trend Analysis Pipeline

[View Project](#)

Technologies: Python, Time Series Analysis, LSTM (Deep Learning), Natural Language Processing, Visualization

Built a data pipeline that predicts hiring trends, in-demand skills, and emerging job roles. It automatically collects data from job boards and search trends, runs forecasting models, and creates easy-to-read charts for market insights.

Sherlock Holmes RAG QA System

[View Project](#)

Technologies: Python, LangChain, FastAPI, Google Gemini API, Vector Embeddings

Developed a Retrieval-Augmented Generation (RAG) system for context-aware Q&A across the Sherlock Holmes canon. Implemented semantic search and a scalable REST API to serve LLM-generated insights.

CERTIFICATIONS

Build an AI That Sees: Image Recognition 2025

Google Developer Groups

Build an AI That Sees: Image Recognition 2025

Microsoft Student Chapter

Certificate of Completion – RSLUP 2.0 2024

Random Software Pvt. Ltd.

Python Programming Beyond The Basics & Intermediate Training 2024

Udemy

Postman API Fundamentals Student Expert 2024

Canvas Credentials (Badgr)

Become a Data Scientist: Statistics for Data Science 2024

Simplilearn
